

How to use Recipe manager for saving values in Codesys.

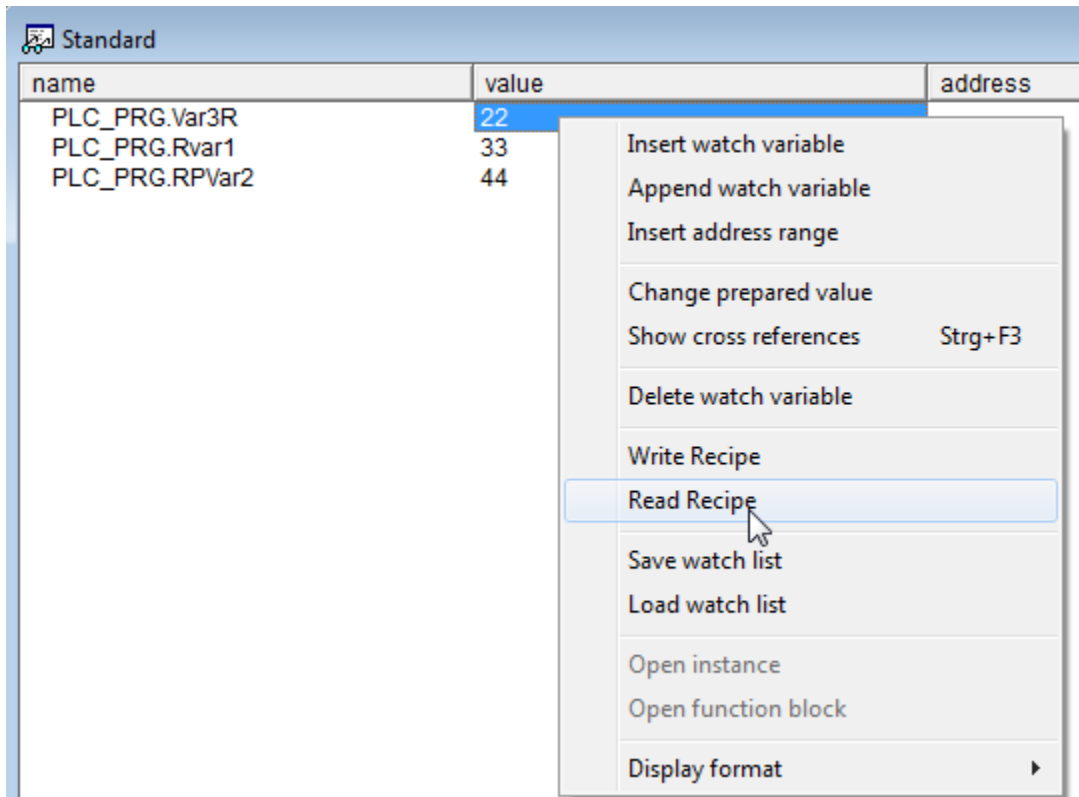

1. First at a mark in Tabular watch editor.(project→options→desktop)

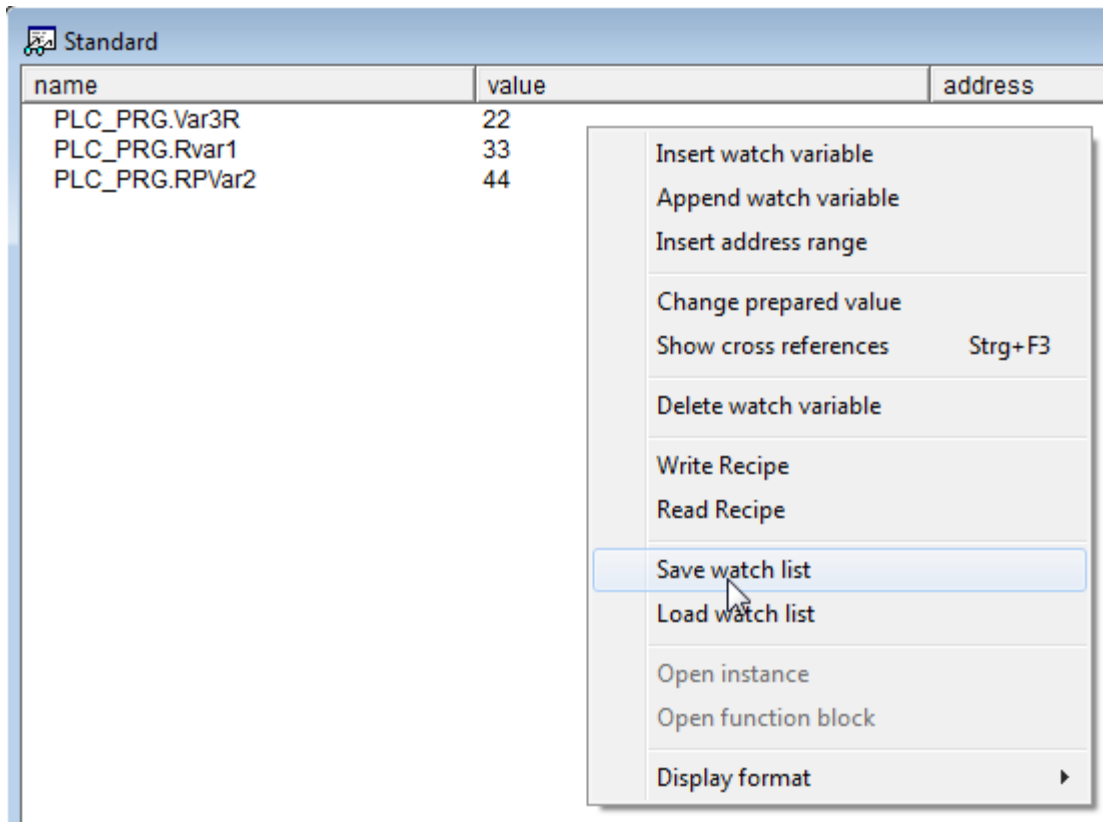

2. Then add your variable. Add to watch list→ standard.

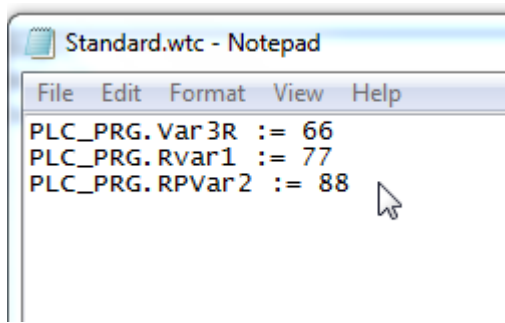

3. Then Read the Recipe to transfer values from program to recipe.

4. Then Save Watch list.

5. You can open the *.wtc with notepad and do the changes you like.

```
Standard.wtc - Notepad
File Edit Format View Help
PLC_PRG.Var3R := 66
PLC_PRG.Rvar1 := 77
PLC_PRG.RPVar2 := 88
```
