

System 800xA version 6.0 Compatibility Matrix

Executive Summary

This document specifies the compatibility of different products, connect packages and BU CT Libraries with System 800xA 6.0.

Products concerned

System 800xA 6.0 and products compatible with System 800xA 6.0

Description of document

The tables below show products, connect packages and BU CT Libraries that are compatible with System 800xA 6.0. In each cell in the tables you will find if the combination of the 800xA 6.0 (column head line) and the specific product, connect package or BU CT Library (row head line) are compatible with each other or not, and in the case they are compatible you will also see what version(s) of the product, connect package or BU CT library that are compatible with the 800xA release.

Nomenclature

The content in the cells can be of four different kinds as described below.

Cell content	Short description	Description
[Any version number]	Compatibility exists	Indicates that the combination of an 800xA version (column head line) and version number(s) listed in the cell for a specific product, connect package or BU CT Library (row head line) are compatible with each other.
To be updated	To be updated within short	Compatibility information not available. Will be updated as soon as validation has been made.
NC (Not Compatible)	Compatibility does not exist	Indicates that tests have been performed or knowledge has been obtained in some other way that the combination of a specific 800xA version (column head line) does not have compatibility with any version of the product, connect package or BU CT Library (row head line)
-/-	No validation for compatibility has been performed	Indicates that no validation for compatibility has been performed yet so whether compatibility actually exists or not is not known.
