1 Transfer an Automation Builder license

1.1 General

It is possible to transfer normal licenses from a PC to another PC or dongel (DM-Key).

This is not possible for ABB internal or temporary licenses, e.g. the 30day Trial license.

The process consists of two main steps:

1. Return the actual license from the actual PC
2. Reactivate the license on the new PC
 - Start Automation Builder, with no project open
 - **Tools \ Add additional license...**

1.2 Return of an Automation Builder license

1. You need your License Activation code that you want to move.
e.g. 47STU-XXXXX-XXXXX-F7BMW-D6A2W
2. Goto the following website:

<http://lc.codemeter.com/32838/depot-return/index.php>

3. Insert your Activation code in the field "Ticket" \ then **Next**

The screenshot shows the 'Ticket' entry page of the CodeMeter License Central WebDepot. At the top, there is a navigation bar with 'HOME', 'English', and the ABB logo. The main heading is 'Welcome to CodeMeter License Central WebDepot'. Below this, a message states: 'Welcome to CodeMeter License Central WebDepot. You can transfer your licenses to your CmContainer using this WebDepot. Please enter your ticket and click "Next".' There is a text input field labeled 'Ticket:' containing the text 'SVMU6-R: < 9ZZ5X'. A 'Next' button is located below the input field. At the bottom, there is a footer with legal notice information.

4. Click on **Re-Host License**

The screenshot shows the 'My Licenses' page of the CodeMeter License Central WebDepot. At the top, there is a navigation bar with 'HOME', 'English', and the ABB logo. The main heading is 'My Licenses'. Below this, there is a table with the following data:

Name	Activated On	CmContainer	Status
DM200-TOOL – Standard license	2018-02-02 12:28:42	128-9895514	Available: 0 (1)

Below the table, there is a 'Re-Host Licenses' button. At the bottom, there is a footer with legal notice information.

If the CmContainer is found, continue with 1.2.2 Online licenses transfer

If the CmContainer is not found, continue with 1.2.3 Offline license transfer

1.2.2 Online licenses transfer

1. Wait till the CmContainer is found, then **Deactivate Selected License Now**

Online License Transfer

Starting license transfer.
Creating license request.
Downloading license update.
Importing license update to CmContainer.
Creating receipt.
Uploading receipt.

✔ License transfer completed successfully!

OK

1.2.3 Offline license transfer

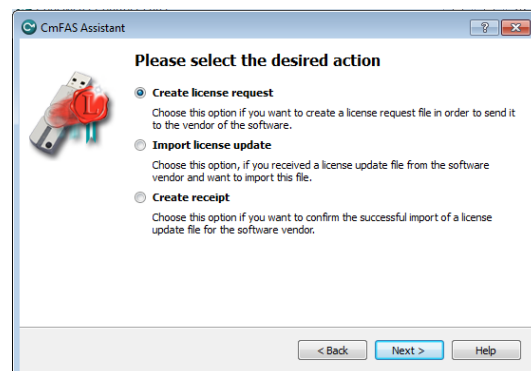

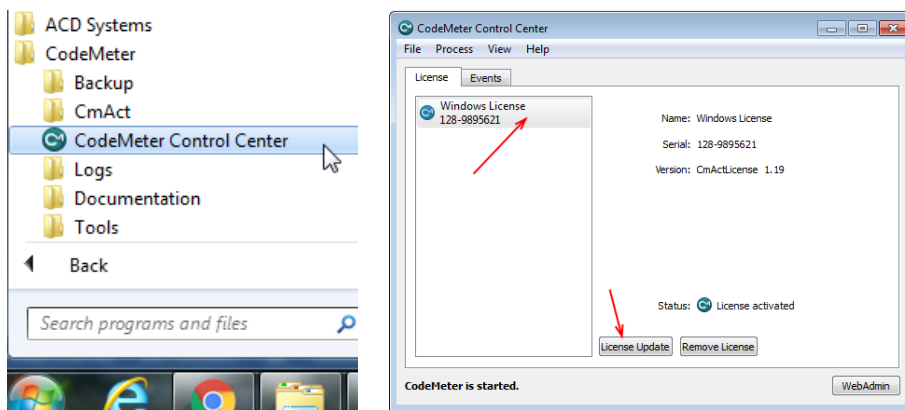

If the CmContainer is not on this PC, then select “**Offline license transfer**” and follow the instructions. – Do finish all steps, including the upload of receipt file to deactivate your license.

1. Create license request file on Offline-PC.

To re-host licenses from one CmContainer to another CmContainer offline: - First step "Upload Request":

1. Create a license request file from the CmContainer with **Serial 128-9895621** and **Firm Code 5000460**. This file can for example be created with CodeMeter Control Center. [How it works](#)

 - a. Start CodeMeter Control Center on the computer where the CmContainer with the **Serial 128-9895621** is.
 - b. Select this CmContainer.
 - c. Click "License Update".
 - d. Follow the instructions of the "CmFAS Assistant". Choose the option "Create license request".
 - e. Choose a filename for the license request file.
 - f. Click "Commit" to save the license request file.
 - g. Transfer the license request file that you just created to this computer.

2. Upload the request file on an Online-PC

3. Download the License Update File

The screenshot shows the ABB CodeMeter License Central WebDepot interface. At the top, there is a navigation bar with 'HOME', 'English', and the ABB logo. Below the navigation bar, the main heading is 'Download License Update File'. A progress bar shows three steps: 'Upload Request' (checked), 'Download Update' (current step), and 'Upload Receipt'. The main content area contains instructions for transferring licenses offline. The instructions are as follows:

To transfer your licenses offline - Second step "Download Update":

1. Click "Download License Update File Now" and save the file on your computer.
2. Import this license update file to the CmContainer with **Serial 128-9895621**. This file can for example be imported with CodeMeter Control Center. [How it works](#)
 - a. Transfer the license update file to the computer where the CmContainer with **Serial 128-9895621** is.
 - b. Start CodeMeter Control Center on the computer where this CmContainer is.
 - c. Select this CmContainer.
 - d. Click "License Update".
 - e. Follow the instructions of the "CmFAS Assistant". Choose the option "Import license update".
 - f. Select the filename of the license update file.
 - g. Click "Commit" to complete this operation.
3. After you have successfully transferred the license update file to the CmContainer, click "Next" to confirm the license transfer.

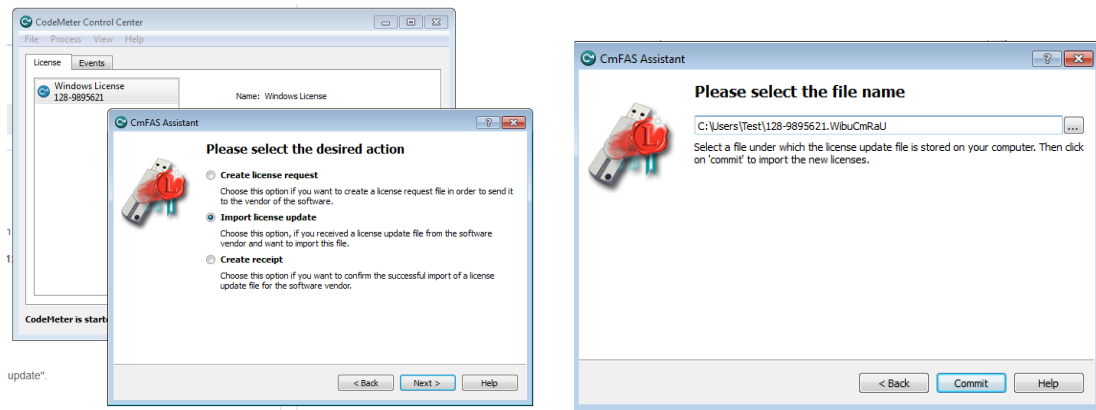

At the bottom of the instructions, there are two buttons: 'Download License Update File Now' and 'Next'. There is also a link for 'Online license transfer' and a 'My Licenses' link.

The screenshot shows a Windows file save dialog box. The dialog box is titled 'Do you want to open or save 128-9895621.WibuCmRaU (116 KB) from lc.codemeter.com?'. The 'File name' field contains '128-9895621.WibuCmRaU' and the 'Save as type' is set to 'WIBU CM remote update file (*.WibuCmRaU)'. The 'Save' button is highlighted, and a context menu is open over it, showing options: 'Save', 'Save as', and 'Save and open'. The background shows the 'Download License Update File Now' and 'Next' buttons from the previous screenshot.

4. Transfer License Update File to Offline-PC

5. Import License Update File into CmFAS Assistant

6. Create License receipt file and transfer it to the Offline-PC

3. After you have successfully transferred the license update file to the CmContainer, click "Next" to confirm the license transfer.
